Attention: Mr. Robert M. Robinson, P.E.
Director, Solid Waste Management Program

Gentlemen:

In response to your "Notification of Hazardous Waste Activity" we enclose the forms issued to us.

At this time we are discharging all waste into the municipal sewer system. As you know, we will be required to meet certain EPA Effluent pretreatment standards as a result. We are, at this time, investigating methods of achieving these standards.

We expect the treatment process will generate sludges that are toxic and will have to be disposed with. However, at this time we can only guess that lead will be the principal toxic agent. We, also, do not have a handle on the generation rate of the sludge; or its ultimate make-up. Accordingly, we have provided what information we can at this time on your forms to facilitate our registration.

I hope our initial response has been satisfactory. I will be at your disposal for any questions your organization has.

Sincerely,

WESTERN WIRE PRODUCTS CO.

Gene B. Young
